Executive summary

Specialized Networks is a Saudi company operating in warehousing and logistic solutions that empower modern businesses to optimize operations, enhance safety, and drive efficiency.

Warehouse Rental Equipment: Complete fleet material handling equipment - mainly forklifts, reach trucks and heavy machinery provided on flexible rental terms with certified operators

Electrical Maintenance & Safety: Expert electrical services specializing in Thermal Imaging (Thermography) for predictive maintenance and certified Earthing System testing to guarantee complete operational and personnel safety

Automated Warehousing & Smart Tracking: We optimize storage space and inventory speed through smart warehouse automation. From AS/RS and automated conveyors to real-time RFID and IoT tracking, we integrate modern hardware directly with your WMS for faster, error-free operations.

Specialized Networks

We provide complete engineering and material handling solutions tailored for your warehouse and industrial operations. Here is an overview of our core services:

Equipment Rental Services

Forklifts and Reach Trucks available on flexible short-term and long-term rental options to keep your operations moving smoothly.

Annual Maintenance Contract (AMC)

Comprehensive maintenance contracts and prompt break down support for Forklifts and Reach Trucks to minimize downtime and preserve equipment efficiency.

Thermal Imaging Inspection

Advanced thermal testing for electrical panels and heavy machinery to detect overheating, prevent unexpected break downs, and lower fire risks.

Earthing Systems & Testing

Professional earthing installation and ground resistance testing to ensure full electrical safety and regulatory compliance for your facility.

Warehouse Automation

End-to-end warehouse automation solutions designed to streamline workflows, improve spatial efficiency, and boost overall productivity.

Integrated Solutions for Rental
Equipment & Facility Support

Vision

To be the equipment rental partner of choice in the Western Region, recognised for fleet reliability, response time and safe operation.

Mission

To keep our clients' operations moving with properly maintained equipment, competent operators and responsive service, on commercial terms that fit the length of the job.

VALUES

Safety first

Uptime

Straight dealing

Local responsiveness

Services & Core Competencies

01

Material Handling Equipment Rental

Short & Long duration rentals of Diesel, LPG and Electric forklifts along with narrow aisle reach truck tailored for high density warehouse operations

02

Annual Maintenance Contract (AMC)

Comprehensive annual maintenance contracts, preventive servicing, rapid breakdown attendance, and standby units to ensure maximum uptime.

03

Equipment Operator Supply

Certified heavy duty equipment operators provided with full shift planning, site induction, and managed by safety compliance.

04

Trailer Rental Services

Flatbed trailer services available for single – trip material transport as well as long term monthly/yearly rentals across regional routes.

05

Electrical Thermal Imaging and Earthing Analysis

Specialized in infrared thermography for predictive maintenance, identifying thermal anomalies and earthing risks to protect facility infrastructure.

06

Smart Warehouse Solutions and Automation

Certified experts delivering real-time fleet management, embedded hardware, and smart IoT automation to minimize downtime and maximize efficiency..

Equipment fleet

Material handling is our specialisation, with transport equipment on the same rental terms to move units between your sites.

Forklift and Reach Truck

Trucks & trailers

Attachments on request

Workshop

Technical Expertise & Team

Strong Execution depends on the right people and the right tools. Our division combines skilled technical teams with proven equipment and smart technology to keep your operations safe, efficient, and productive.

A

Material Handling Equipment Rental

We offer a diverse fleet of Diesel, LPG, and Electric forklifts and reach trucks on flexible rental terms. Every unit arrives with fully serviced and site-ready for uninterrupted operations with trailers available for transport.

C

Thermal Imaging Scanning & Earthing

Our expert electrical engineers use Thermal Imaging cameras to detect electrical hazards, phase imbalances, and voltage disturbance before they cause critical equipment failure. We also provide earthing/grounding resistance testing to ensure electrical safety.

B

Workshop and AMC Services

We deliver comprehensive preventive and corrective maintenance services to maximize equipment uptime, extend operational life span, and minimize unscheduled downtime with planned inspections and SLA-backed response times.

D

Smart Warehouse Solutions

Our tech experts deliver complete technology solutions and platform – spanning hardware and software, turnaround tracking, and asset management/auditing software, supported by equipment-based condition monitoring system and expert tech consultation.

WHY CLIENTS CHOOSE US

The Value of Partnering With Us

Cost Efficiency

Pay for services and equipment as you need them-no heavy capital investment in machines, tool or automation systems.

Reduced Downtime

Preventive maintenance, early hazard detection, and automated monitoring keep your operations running without unplanned stoppages.

Expert-Led Execution

Certified engineers and technicians handled servicing, testing and system integration-freeing your team to focus on core work

Scalable and Flexible

Scale equipment, manpower, or automation capacity up or down based on project demand and site requirements

Preventive Protection

Early fault detection and certified testing help prevent breakdowns before they happen – reducing repair costs and unplanned downtime

Service Models & Engagement Terms

SERVICE	SUITED TO	INCLUDED
Equipment Rental	Peak loads, shutdowns, short or long-term projects	Delivery, servicing, breakdown attendance, operator on request
Workshop & AMC	Ongoing fleet upkeep, planned maintenance	Preventive & corrective maintenance, parts, SLA-backed response
Thermal Imaging and Electrical Services	Periodic safety checks and hazard prevention	Certified engineers, scanning, earthing/grounding network testing
Smart Warehouse Solutions	Digital tracking, asset & inventory management	Software platform, hardware integration, tech consultation

Proposal will be based on requested services, duration and site location.

Service & maintenance support

01 Pre Rental Inspection

All equipment undergoes complete multi-point safety checks before it leaves yard.

02 Scheduled Maintenance & Breakdown Response

AMC Servicing planned around your shift patterns, backed by rapid-response repair teams and standby replacement units, keeping downtime to a minimum.

03 Thermal Imaging & Earthing Analysis

Periodic infrared scans and earthing checks conducted on site to eliminate electrical hazards and secure uninterrupted warehouse power.

04 Smart Monitoring & Reporting

Round the clock telemetry, automated alerts, and detailed reports provide full visibility into fleet health and history.

DIFFERENTIATORS

Why clients choose us

Specialized in Services

Our core discipline covers specialized material handling machinery, diagnostic thermal imaging for facility safety, and smart warehouse automation

Certified Technicalities

Powered by certified technical engineers, advanced diagnostic testing, and full safety compliance.

Quality Assurance

Certified equipment and rigorous maintenance protocols ensure peak performance.

Transparent Commercials

Clear pricing, defined inclusions, and transparent terms matched directly to your project duration with no hidden costs.

Quality & HSE policy

Quality assurance

We maintain documented procedures for equipment inspection, servicing and handover, with corrective action recorded and reviewed by management.

Inspection checklists on delivery and return

Maintenance history held per unit

Client feedback reviewed on every contract

Working towards ISO 9001 certification

Health & safety

No job is delivered at the expense of safety. We comply with Saudi regulations and client site rules, and we stop work when conditions are unsafe.

Operators licensed, trained and inducted to site

PPE and equipment safety devices mandatory

Incidents reported, investigated and closed out

Practices aligned to ISO 45001 principles

Organisation structure
